

# Declutter + Organize

## KID'S BEDROOM EDITION

### STEP 1

#### MAKE 3 PILES

Make a pile for each category: keep items, donate items, toss items. Use my "unicorn box" method if needed. Check the blog!

### STEP 2

#### PREPARE STORAGE

Use bins and baskets with labels to store items that will be kept. Group like items together for easy cleanup!

### STEP 3

#### CHECK UNDER BED

Don't forget to check under the bed! This spot is easily overlooked. With the right storage systems, under bed storage can increase storage space.

### STEP 4

#### CLEAN

Clean bed sheets, carpets, floors, or rugs and have kiddos wipe down surfaces and walls. Open a window and diffuse some essential oils for the ultimate clean feeling.

### STEP 5

#### GET RID OF TRASH

Get rid of trash and donate items immediately! Do NOT let them sit in the house. Take a drive to goodwill or a friend's house to give donate items away and make someone else's day.

### STEP 6

#### DEVISE A PLAN

Create a cleaning checklist for kiddos for everyday cleanup and schedule a day in the family calendar once or twice a month for a quick clean out session. Offer a family reward post clean up for a fun family tradition.
